

Warning

BEFORE USING THIS BANG STICK, READ AND FOLLOW THE WARNINGS AND INSTRUCTIONS CONTAINED IN THIS MANUAL.

Failure to read and properly execute the instructions and warnings in this manual could result in serious injury, death or damage to property.

Do not attempt to practice loading or unloading with live ammunition without an understanding of the safe operation of this bang stick.

Treat any bang stick as if it were loaded.

Always store and carry this product unloaded and the dual safety on. Failure to do so could result in an unintentional discharge.

Keep out of reach of children.

When any pressure is applied to the end of the barrel, you must expect the bang stick to fire and take full responsibility for your actions.

Read through the entire manual before attempting to use this product.

Safety

The bang stick is equipped with two safety features which if properly employed can minimize the danger of accidental discharge.

NOTE: Never rely on mechanical safeties to overcome improper maintenance or unsafe handling practices. Always point the barrel in a safe direction away from people, feet, hands, animals, etc. Anything you don't want to shoot.

HAIRPIN SAFETY

The hairpin safety is a pin between the breech and the knurled safety nut that when inserted will prevent the inner spring from compressing and engaging the firing pin. Always use both safeties until ready to fire. Remember to keep bang stick unloaded until ready to use.

KNURLED NUT SAFETY

The knurled nut safety is a nut below the breech that when screwed flush against the breech or hairpin safety will prevent the inner spring from compressing and engaging the firing pin. Always use both safeties until ready to fire.

All bang sticks are compliant to Federal Revenue Ruling #55-569. All bang stick are attached to a 5ft floating aluminum pole. Permanent attached via thread lock. Do NOT remove breech from pole.

Warning: Alligator Hunting and alligator hunting equipment can be dangerous. Use at your own discretion.

Ammunition

Only use ammo that your bang stick was designed for. DO NOT use .357mag ammo in a .44mag barrel or vice versa.

Do NOT use hand load / remanufactured ammo.

Only factory first.

Loading and Unloading

Do not attempt to practice loading or unloading with live ammunition without an understanding of the safe operation of this bang stick.

Keep barrel pointed in safe direction and follow all safety procedures at all times.

With knurled nut safety and hairpin safety in place, unscrew the barrel and insert round of the caliber for which your bang stick barrel is designed with the primer end of the round at the back of the barrel (threaded end).

Screw barrel back on breech.

The bang stick is now fully loaded and ready to fire. Keep barrel pointed in a safe direction, Away from anything you dont intend to shoot hands, fingers, feet, boat, etc.

Unscrew knurled nut safety and remove hairpin safety to fire.

Always unload bang stick immediately after use and before storage.

Firing Your Bang Stick

Always wear safety glasses and hearing protection when firing a bang stick.

When ready to fire, turn knurled safety nut away from breech (counter clock wise) and remove hairpin safety.

Make sure target is at least 12-18 inches underwater.

With the gator tired out and is remaining calm. Hit the below the moon shaped skull plate. You DO NOT want to hit the plate. With a pool like shot, enough pressure on the spring for the firing pin to make contact with the primer. to the soft spot of the gator the bang stick will fire. If bang stick does not fire wait 1-2min before unloading and replacing ammo(follow the loading and unloading procedures). Always point the barrel away from hands, feet, boat, etc.

Immediately apply both safeties.

ALWAYS KEEP SAFETIES ON LOADED OR UNLOADED!

By using this equipment you are agreeing you to the conditions ALLIGATOR HUNTING EQUIPMENT LLC IS NOT RESPONSIBLE FOR ANY DAMAGES, DEATH, INJURYS FROM USING ANY OF OUR EQUIPMENT.
